## ADDITION EXPERTISE

On the basis of the Expertise "Testing of the effectiveness of a decontamination process for used hollow needles (canulae) in the disinfectant for medical waste sinTion® from September 2019

„The steam-disinfection process in the disinfectant for medical waste sinTion® designed for the decontamination of used canulae (needle program) is able to kill all microorganisms corresponding to the **resistance groups A, B and C under worst case conditions.**

ADDITION: It is therefore suitable for the decontamination of medical waste that has been in contact with **Anthrax, Ebola, HIV, Hepatitis viruses, Coronaviruses (e.g. SARS-CoV, MERS-CoV, 2019-nCoV)** as well as others."
